

With Aurora it's not just OK, it's **AOK.**

If it's a job done by Aurora Preferred Suppliers – Heating & Cooling, it's done right or it's fixed.

These days it's hard to get a guarantee that's actually worth the paper it's written on. But this one is, so keep it safe just in case it's needed. AOK is the short name we give to the Aurora Customer Service Guarantee. It's also your assurance of a top job every time.

Here's why it's AOK.

If you are an Aurora Energy customer the Aurora AOK Guarantee applies to the quality of the installation job conducted by our Aurora Preferred Suppliers – Heating & Cooling. Aurora guarantees that the job will be done properly, and if not, Aurora will arrange for remedial work to fix the problem. The AOK Guarantee does not however, replace any manufacturer's warranty. If there is a problem with the appliance itself you will need to make a claim under your warranty directly against the manufacturer. You should ensure that you still receive a manufacturer's warranty for the appliance from our Aurora Preferred Suppliers – Heating & Cooling.

Your AOK Guarantee is valid from the date of your invoice and/or receipt from our Aurora Preferred Suppliers – Heating & Cooling, so please retain these records along with your manufacturer's warranty. While you are an Aurora customer the AOK Guarantee stays in effect for a minimum of twelve months after the installation date*. However, if a problem arises within a reasonable time beyond that date, Aurora will guarantee to investigate the complaint.

What to expect from our Aurora Preferred Suppliers – Heating & Cooling.

- Our Aurora Preferred Suppliers – Heating & Cooling will offer sufficient information and advice to help you make an informed decision. In most cases this should include an inspection of your premises and a face-to-face presentation.
