

# Why use a clothes dryer when the sun is free?

SUN

Why wash in hot water when washing in cold water  
can save you a lot of money in energy costs?

And did you know a dripping hot water tap can waste up to  
50 litres of hot water a day? Replace the washer and save.

Hot water heating is typically around 25% of your energy bill  
so think about how you use hot water like making sure the  
dishwasher is full and installing water saving showerheads.

It's that simple to save energy.

**SAVE ENERGY, SAVE MONEY.**
