Course Name: (JET30206) Certificate III in ESI Distribution
(Powerline)

Objective: This course will give the participants a national certification to operate as a qualified lineworker within Tasmania's distribution environment.

Aurora Energy Training's powerline apprentices are involved with the overhead work crews (lineworkers) undertaking the daily construction and maintenance of the overhead distribution network. These crews undertake a wide variety of tasks some of these being:

- construction of new overhead distribution lines
- augmentation of existing overhead conductors and apparatus,
- erection and removal of poles, installation of high voltage switchgear
- attending faults as required.

Please note that distribution linework is conducted at heights and at times in remote areas.

Prerequisites:

- Year 10 minimum pass mark
- Desired prerequisites include Maths 421 & Science 424.
- Desirable: 18 years and over (for plant licensing purposes)
- A current drivers licence would also be advantageous.
- Optional: Prospective applicants can also undertake pre-vocational training such as Certificate I Electrotechnology.

Duration: Normally 4 years (Dependant on numbers and experience of Trainees)

Venue: Aurora Energy Mornington

Cost: To be advised
